Different block weapons have different abilities, is it best to kill the enemy with a melee combat knife or make a gun for it? Sniper him from a distance or extinguish his survival using a bazooka? Let me tell you this, in this modern shooter game, snipers are great for city maps and are also an outstanding firearm in team deathmatches. While your police team runs into hordes of robbers with block knives, blazing kalashnikovs and wandering RPGs, you can eliminate enemies in stealth mode. Another evil craft is waiting for the robbers to gather downtown and blow them up using missiles like weapons. Or you can use close combat weapons in fast-paced city battles to take the robbers out from a short distance. However, if you want to enjoy great multiplayer action in a nice old shooting game style, choose a colt commando or AK 47 and have fun shooting! You have to keep improving in this shooting game, the more wars you get stronger. After each game you will improve the experience, which allows you to create new weapons n skins. Buy modern weapons & fps enhancers such as armor, ammunition, and firearms to your weapons. You can upgrade your firearms to increase your ammo capacity, accuracy, and fire rate. There are many different skins in this pixel shooter, playing as generals, zombies, boys or cops! Choose your war skin wisely, some skins work well for night time maps, blend in with the battlefield and increase your chances of survival, some just look really cool! You can blow up enemies in different worlds! There are fps maps that take place in deserts or cities. You can shoot the robbers at night in the port container fields or during snowy days in the open arena or even in space! Be wise to choose the best shooting game mode for you! During deathmatch wars you can shoot all your opponents. Get your best gun out n cause destruction. This is survival at its strongest. However, when trying to deathmatch a team, do your best to help your military command! Give them support by using missile weapons or jumping into action shooters with rifles! When you have chosen capture flag mode, you have to make a smart plan. Find the right balance between maintaining your command post while trying to capture the robber base. One tactic of war is to divide the bloc's troops. One large command block will go behind enemy lines, shooting everyone in the city, while the other commando will keep your flag to Full! The battle is yours! Experience 3D warfare like never before! Cause a great catastrophe! Wide range of firearms offer the best shooting experience & awesome for hours in this action world.
